INSTRUCTIONS FOR COMPLETING FORM NTIS-35 (10-70) (Bibliographic Data Sheet based on COSATI Guidelines to Format Standards for Scientific and Technical Reports Prepared by or for the Federal Government, PB-180 600).

1. **Report Number.** Each report shall carry a unique alphanumeric designation. Select one of the following types: (a) alphanumeric designation provided by the sponsoring agency, e.g., **FAA-RD-68-09**; or, if none has been assigned, (b) alphanumeric designation established by the performing organization e.g., **FASEB-NS-87**; or, if none has been established, (c) alphanumeric designation derived from contract or grant number, e.g., **PH-43-64-932-4.**

2. Leave blank.

3. **Recipient's Accession Number.** Reserved for use by each report recipient.

4. **Title and Subtitle.** Title should indicate clearly and briefly the subject coverage of the report, and be displayed prominently. Set subtitle, if used, in smaller type or otherwise subordinate it to main title. When a report is prepared in more than one volume, repeat the primary title, add volume number and include subtitle for the specific volume.

5. **Report Date.** Each report shall carry a date indicating at least month and year. Indicate the basis on which it was selected (e.g., date of issue, date of approval, date of preparation.

6. **Performing Organization Code.** Leave blank.

7. **Author(s).** Give name(s) in conventional order (e.g., John R. Doe, or J.Robert Doe). List author's affiliation if it differs from the performing organization.

8. **Performing Organization Report Number.** Insert if performing organization wishes to assign this number.

9. **Performing Organization Name and Address.** Give name, street, city, state, and zip code. List no more than two levels of an organizational hierarchy. Display the name of the organization exactly as it should appear in Government indexes such as **USGRDR-I.**

10. **Project/Task/Work Unit Number.** Use the project, task and work unit numbers under which the report was prepared.

11. **Contract/Grant Number.** Insert contract or grant number under which report was prepared.

12. **Sponsoring Agency Name and Address.** Include zip code.

13. **Type of Report and Period Covered.** Indicate interim, final, etc., and, if applicable, dates covered.

14. **Sponsoring Agency Code.** Leave blank.

15. **Supplementary Notes.** Enter information not included elsewhere but useful, such as: Prepared in cooperation with . . . Translation of . . . Presented at conference of . . . To be published in . . . Supersedes . . . Supplements . . .

16. **Abstract.** Include a brief (200 words or less) factual summary of the most significant information contained in the report. If the report contains a significant bibliography or literature survey, mention it here.

17. **Key Words and Document Analysis. (a). Descriptors.** Select from the Thesaurus of Engineering and Scientific Terms the proper authorized terms that identify the major concept of the research and are sufficiently specific and precise to be used as index entries for cataloging.
(b). Identifiers and Open-Ended Terms. Use identifiers for project names, code names, equipment designators, etc. Use open-ended terms written in descriptor form for those subjects for which no descriptor exists.
(c). COSATI Field/Group. Field and Group assignments are to be taken from the 1965 COSATI Subject Category List. Since the majority of documents are multidisciplinary in nature, the primary Field/Group assignment(s) will be the specific discipline, area of human endeavor, or type of physical object. The application(s) will be cross-referenced with secondary Field/Group assignments that will follow the primary posting(s).

18. **Distribution Statement.** Denote releasability to the public or limitation for reasons other than security for example "Release unlimited". Cite any availability to the public, with address and price.

19 & 20. **Security Classification.** Do not submit classified reports to the National Technical Information Service.

21. **Number of Pages.** Insert the total number of pages, including this one and unnumbered pages, but excluding distribution list, if any.

22. **Price.** Insert the price set by the National Technical Information Service or the Government Printing Office, if known.

FOREWORD

The Bureau of Radiological Health continues to carry out a national program designed to reduce the exposure of man to hazardous ionizing and nonionizing radiation.

Within the Bureau, the Office of Information assists and coordinates the public and technical information activities which include: public information; preparation of consumer pamphlets, the BRH BULLETIN, the Annual Report to Congress, and other special documents as necessary; information clearance; division, office, and laboratory technical report and technical note series coordination and policies; distribution of reports to scientific and technical communities and the public as appropriate; and audio-visual loan and library reference services.

This BRH Publications Index is an important tool for the Bureau's staff and others with a responsibility in radiological health.

PREFACE

This BRH Publications Index is prepared periodically primarily for the use of the Bureau to maintain a record of the publications produced. The Index is a vital tool to the Office of Information for management of its publication distribution and supply system. The Index is updated periodically and once a year reproduced for distribution to the Bureau staff and the State and local radiological health programs and for use in answering public inquiries for a list of publications.

The assistance of Mrs. Evalene Palmer, Secretary for the Information Clearance Committee, and Mrs. Mickey Wimberly, Data Systems and Mathematics Staff, was essential in the production of this index and is sincerely appreciated.

BRH PUBLICATIONS INDEX

INTRODUCTION

This Key Word in Context (KWIC) index to the publications of the Bureau of Radiological Health was prepared to aid in the retrieval and identification of publications originated or authored by Bureau staff. These publications include journal articles, government publications and technical reports, audio-visual materials, and selected staff papers.

For convenience, the document is divided into three sections, KWIC Index, Author Index, and Bibliography Index as described below.

KWIC Index

The KWIC Index is a listing of each title of Bureau-originated (author or contractor) publication of which the Bureau has evidence of publication. The index is an alphabetical permutation of the keywords in each title. The computer is programmed to reject certain title words, such as all one- and two-letter words and other nondescriptive words from alphabetization in the KWIC Index. A one-line entry appears for each keyword in the title. An asterisk indicates the first word in the title. To the right of each entry is a five-digit accession number. The first two digits indicate the year of BRH Information Clearance Committee processing, and the last three digits show the Information Clearance Committee serial number of the manuscript within that year. Technical report numbers have usually been included as part of the title for ease of retrieval through the KWIC Index.

Not all publications have received clearance through the BRH Information Clearance Committee. Such items not cleared have been assigned accession numbers beginning with 400 within each year. Published abstracts have not been included. Information Clearance Committee records were started in 1961 when the Committee was formed. Publications prior to 1961 have been assigned accession numbers in the 400 series.

The length of title appearing in the index is limited by the computer program used to generate the KWIC. Thus, if the complete title is needed, it can be located in the Bibliography Index by using the accession number.

In many cases, the exact title as it appeared in the publication was modified because of the computer system limitations (e.g., no superscripts, lower case, or Greek symbols). The radionuclide designations were changed so that they could be grouped alphabetically in the KWIC Index. Also, hypens were either added or deleted to facilitate alphabetical listing of keywords in the KWIC Index and to reduce the number of nonsignificant listings. Example of the changes are:

- carbon dioxide replaces CO_2
- I-125 replaces ^{125}I or iodine-125
- gamma-ray replaces γ-ray
- in-vitro replaces *in vitro*

Author Index

The Author Index provides an alphabetical listing of all authors whose names appear in the Bibliography Index. The column to the left of the alphabetical author listing contains the accession numbers as described for the KWIC Index. The column to the right of the alphabetical author listing contains one-digit numbers to indicate the author order (first author, second author, and so forth). Not all authors were, or are, Bureau of Radiological Health staff. Some publications are listed because the Bureau sponsored their publication.

Bibliography Index

The Bibliography Index gives the complete title of each article (except as modified for the KWIC Index), the authors(s), and the publication citation utilizing, when possible, the abbreviations for journals recommended by Index Medicus List of Periodicals. The accession numbers are not continuous since these numbers are assigned to manuscripts submitted for clearance, and of course, all do not receive publication.

Availability of Publications Listed

Most of the articles listed that have been published in journals are available through regular technical libraries. Reprints of many journal articles listed are available from the publications clerk, Office of Information. The Bureau's technical reports series are available also from the Office of Information until the supply is depleted. In all applicable cases, the technical reports have been submitted to the National Technical Information Service (NTIS), formerly the Clearinghouse for Federal Scientific and Technical Information (CFSTI), Springfield, Virginia 22151, for announcement in their abstract journal. The price is normally \$3.00 for paper copy and \$0.95 for microfiche. After two years, paper copy price is \$6.00. Reduced prices are available for bulk quantities. The PB number indicated for the report should be cited when ordering from the NTIS. In many cases, the publications are available for purchase from the Superintendent of Documents (Sup. Doc.), U.S. Government Printing Office, Washington, D.C. 20402. Stock number and price are indicated in the bibliography for ordering.
